Plovdiv 12 November 2018

Dear Sirs

After several tests and verifications, we confirm that the Solargum COOL-ROOF produced by Bizeta SRL Pietrelcina BL. Italy, Applied in 2012 at the University Hospital of Plovdiv has been kept stable, with characteristics equal to when it was applied even after cold winters and hot summers.

Within the building where the product was applied in the summer, it resulted in a temperature lowering of 6 degrees.

Electricity consumption decreased by 4%-

Very best regards.

Arch. Mauro Coa
